Overview

During the Middle Ages, the residents of the low-lying bog, where presently Amsterdam stands, were forced to work together to simply survive. Overcoming differences in lifestyle and religion in favor of common interest, they built dykes to keep the sea out of the "polder" (the term used for land behind the sea).

The early social cooperation, created the Dutch word "polder model", meaning consensus decision-making. This concept is widely regarded as the basis for Amsterdam's tolerance and open-mindedness. Dutch writer Herman Pleij aptly remarks that "The Netherlands owes its existence to a democracy of dry feet". The city's progressive, forward thinking spirit has created a cosmopolitan air that makes this small city (population only 767,000) the envy of its European neighbors.
